CLAIMS:

1. A valve assembly able to be mounted with a liquid container, the valve assembly comprising:

a housing having a passageway that extends through the housing;

a breather float valve mounted within the housing, the breather float valve movable between an open position to allow gas to pass through the passageway and a closed position that prevents liquid from passing through the passageway;

an liquid inlet, forming part of the housing, the liquid inlet allowing fluid to pass into the housing; and

an inlet float valve mounted within the housing, the inlet float valve movable between an open position that permits the flow of liquid through the liquid inlet and a closed position that prevents the flow of fluid through the liquid inlet.

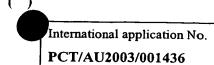

- 2. The valve assembly of claim 1 wherein the valve assembly includes a relief valve that is movable between an open position and a closed position to allow pressure to be relieved from the container.
- 3. The valve assembly of claim 1 wherein the housing is cylindrical.
 - 4. The valve assembly of claim 1 wherein inlet float valve includes a float and a stem.
 - 5. The valve assembly of claim 4 wherein a valve seal is located adjacent the end of the stem.
- 25 6. The valve assembly of claim 5 wherein a fuel chamber is located adjacent the liquid inlet in which fuel is passed.
 - 7. The valve assembly of claim 6 wherein a shelter is provided within the fuel chamber in which an end of the stem is located when the float valve assembly is in the open position.
- 30 8. The valve assembly of claim 1 wherein the breather float valve includes a rod and breather float.
 - 9. The valves assembly of claim 8 wherein a spring engages the

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

2.1 Novelty (N) and Inventive Step(IS):

None of the documents cited in the International Search Report or any combination of them can be considered to anticipate the invention as defined in claims 1-10. The cited documents describe only the general state of the art, which is not considered to be of particular relevance to the invention.

Therefore, the claims are considered to meet the criteria of Novelty, Inventive Step.

2.2 All the claims conform to the criteria of Industrial Applicability
